# Junk events

How weird is weird?

Evt: 4, n_{pts}: 310, E_{in}: 41.58, E_{vis}: 86.87

Evt: 16, n_{pts}: 480, E_{in}: 11.11, E_{vis}: 139.80

How to cut the events?

- Seems like min points might be between 300 and 500
- Seems like min total energy might be between 80 and 180
- Is there any existing stategy?
- Favour cutting everything?
