ATLAS ITk strip end-cap system test at DESY

Friday 20 September 2024 09:36 (18 minutes)

In preparation of the full experiment, a system test of the ATLAS ITk strips end-cap with up to 12 petals is taking place at DESY. All aspects of the full detector setup will be tested (mechanics, powering, cooling, readout).

In this presentation the setup of the system test and first tests of fully loaded petals in it will be shown.

Presenter: MAUER, Konstantin (ATLAS (ATLAS Upgrade))

Session Classification: Stream 3
