

10. Annual MT Meeting

Contribution ID: 89

Type: **not specified**

IDAF: Interesting times ahead

The IDAF is a LK-II computing facility within MT, operated at DESY.

This contribution will discuss some challenges ahead:

- Sustainability: How to make computing greener?
- LHC Computing: How to adapt to a new concept for university T2 in Germany?
- Analysis Facility Evolution: WLCG and other communities in Germany are discussing new concepts. How can they change the IDAF?
- Preparing for next large LK-II facility: Petra-IV: More data, more diverse user community, new analysis workflows and technologies...

Speed talk:

Normal speed talk selection
