

Next Generation Environment for Interoperable Data Analysis - 2nd Expert Workshop

Contribution ID: 17

Type: **not specified**

Analysis Facilities

Tuesday 17 September 2024 11:30 (45 minutes)

Large experiments usually have well established computing solutions for the centrally managed processing of data, but this is in general not the case for the analysis of data by individuals or small groups. To be able to handle the expected increase of data at analysis level a collaborative project plans to work on technologies that improve the turn-around time and FAIRness of (interactive) data analyses.

Presenter: KUHR, Thomas (BELLE (BELLE II Experiment))

Session Classification: Invited Talks II
