Reana Tutorial I

Tuesday 17 September 2024 14:00 (2h 30m)

Starting from the Tutorial https://gitlab-p4n.aip.de/punch_public/reana/tutorials that the PUNCH4NFDI project has created, we will introduce to working with REANA. And we then can work on example you bring with you.

Caveata albeit a considerable range of different use cases are already worked out, please pick one that is of medium level difficulty in your field and does not require terabyte of data to be processed or special resources (FPGA boards etc.)

For preparation: please follow the instructions in the Tutorial' ReadMe and install the REANA client on your laptop.

Presenters: Dr SACCHI, Elena (AIP); ENKE, Harry (AIP)

Session Classification: Hands-On
