

# TA5 WP4 meeting

Andreas Redelbach (FIAS)

14/08/2024

# Overview

- **Midterm report:** First use cases and „visible“ achievements to be documented
- **ML-PPA** as repository, prototype and integration
- Dedicated meeting in the **cross-TA meeting next Wednesday, 21 August at 9:00:** So far, we were taking into account the Higgs to four Leptons example (Achim) as well as the astro simulation post-processing by Prateek. If you have further examples, which could be made available, please join the meeting or, in case you are on holidays, let Christiane know so that we keep you in the loop.
- **TA5 Workshop on Machine Learning and Data Processing on FPGAs** will take place at TU Dresden on September 18-19, 2024:
  - Registration is open
  - Several contributions confirmed
  - Tutorial: Running ML models on an Alveo card using hls4ml
  - Indico: <https://indico.desy.de/event/45348/>
- TA5 meeting in September
- Annual PUNCH meeting in Bonn end of November (contributions/tutorials welcome)
