

Reco vs Truth Plots

September 12, 2024

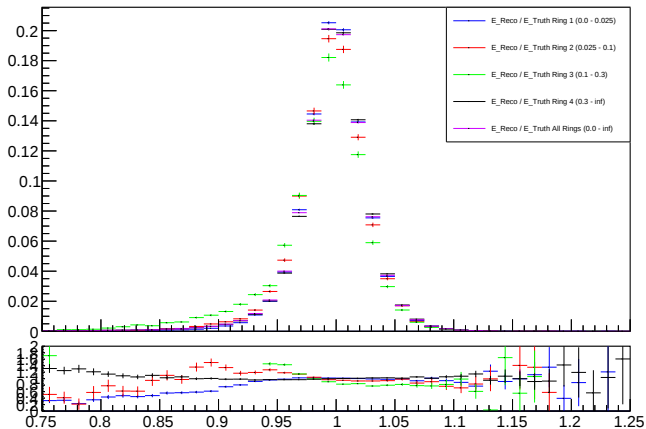

Table of contents

Description

- ▶ Selection - Electrons are first selected based on Eta to determine which section of the calorimeter it is in (Barrel or Endcap).
Then selects FSR photon with smallest delta R (w.r.t. both leading and subleading electrons) - determines the FSR photon pT and the dR Ring which electrons are sorted into.

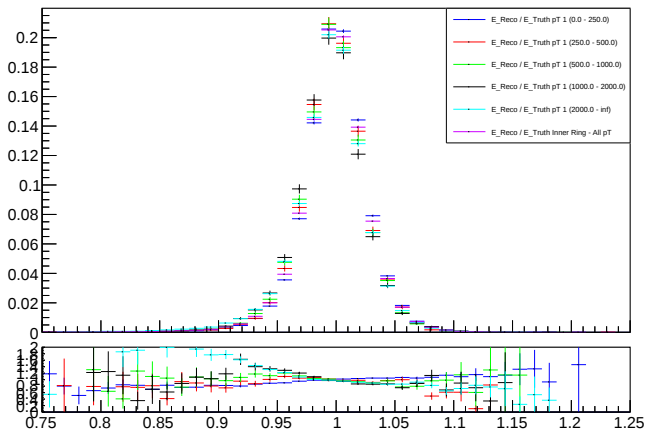

Reco Energy vs Truth Energy - Barrel-Barrel - All Rings

$E_{\text{Reco}} / E_{\text{Truth}}$ - All Rings

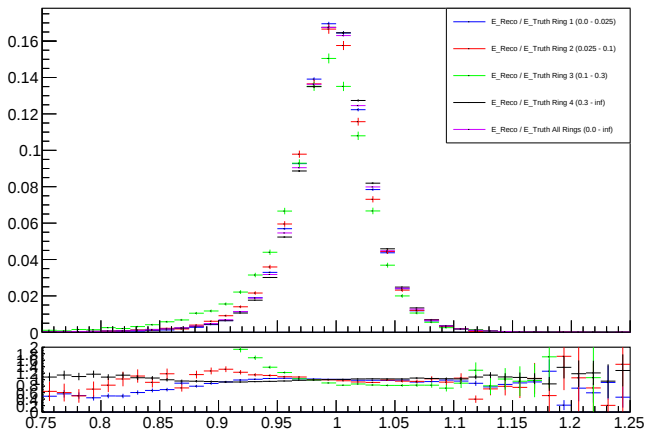

Reco Energy vs Truth Energy - Barrel-Barrel - Inner Ring

$E_{\text{Reco}} / E_{\text{Truth}}$ - Inner Ring (0.0 - 0.025)

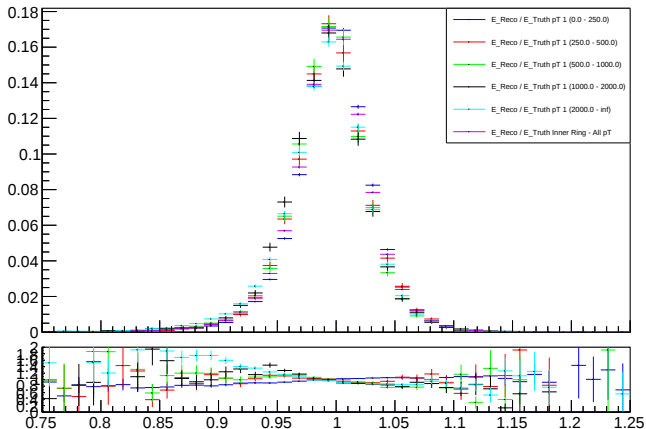

Reco Energy vs Truth Energy - Barrel-Endcap - All Rings

$E_{\text{Reco}} / E_{\text{Truth}}$ - All Rings

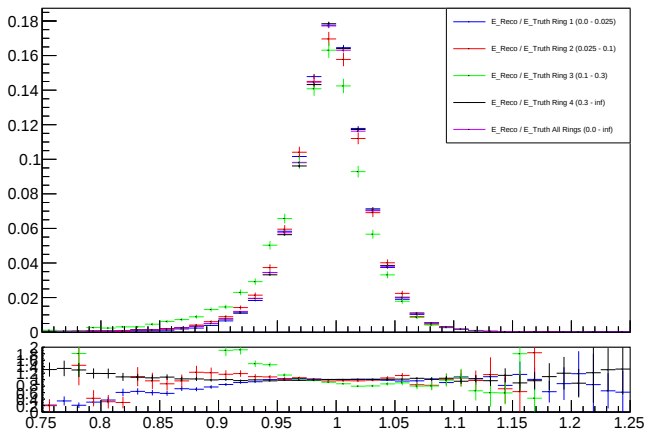

Reco Energy vs Truth Energy - Barrel-Endcap - Inner Ring

$E_{\text{Reco}} / E_{\text{Truth}}$ - Inner Ring (0.0 - 0.025)

Reco Energy vs Truth Energy - Endcap-Endcap - All Rings

$E_{\text{Reco}} / E_{\text{Truth}} - \text{All Rings}$

Reco Energy vs Truth Energy - Endcap-Endcap - Inner Ring

$E_{\text{Reco}} / E_{\text{Truth}} - \text{Inner Ring (0.0 - 0.025)}$
