

Development of a Professional Q&A AI Agent for Beam Scientists and Users Using LLM and RAG Technologies

Friday 22 November 2024 10:42 (6 minutes)

Based on the LLM (Large Language Model) and RAG (Retrieval-Augmented Generation) technologies, the FS-EC group has developed a technical documentation and code retrieval Q&A AI Agent. This Agent will be further enhanced by integrating historical Q&A information from the ticket system, aiming to co-develop a professional Q&A AI Agent for beam scientists and users.
