# NFDI and beyond

## Sprecherkreis

- Defense of the proposals of 1<sup>st</sup> round consortia
- Financial situation “in between” funding periods
- NFDI architecture: important for the MC proposal for Base4NFDI (planned for Jan 2025), all consortia should contribute, a common architecture for 4Ing and MatWerk exists (basically same colleagues at RWTH and KIT (SCC)), first “raw” version of the architecture should exist ~by the end of the year, all consortia are asked to contribute but then also to consent
  - PUNCH members in NFDI architecture group? – get in touch with Kilian

Physical Sciences in NFDI: currently only the workshops remain and sharing each others invitations, try to prepare a schedule for seminars in 2025 → any suggestions?

## Base4NFDI

- 3<sup>rd</sup> call for incubator projects by IAM4NFDI: deadline for proposals is 18 Dec
- Projects get URLs like iam.nfdi.de or software.nfdi.de etc

NFDI talk: slots for 2025 should be booked now

Publications: RSE <https://zenodo.org/records/12704414>

EOSC EU node: <https://open-science-cloud.ec.europa.eu/>

NFDI selected for one of the first Potential Candidate EOSC Nodes

# Main discussion

Annual Meeting

<https://indico.desy.de/event/45458/>

Cross-TA sessions: chairs are Christoph (use case & services) and Michael Z (further services and tools)

Use case session: small set of status presentations, capture information/ properties of use cases (before hand) on relation of use cases towards infrastructure, future plans for services (2 years)

Services and Tools session (like Noticeboard, physics.tools etc): collect existing tools and ideas, how to integrate into SDP

ErUM-Data proposals

- Plans for proposals which build on PUNCH?
  - Federated Infrastructures: Analysis Facilities, compute, storage, astro data centre (two initiatives presented)
  - RDM? – possibly astro data centre
- Which services should we offer to proposal teams? (Gitlab, AAI, C4P, ...) - PUNCH develops for community – go via Hub, coordinate with DAPHNE

# Thank you!
