

AFS/OSD Update

Wednesday, 5 October 2011 13:30 (30 minutes)

**Estimated length of presentation
(in minutes, may be changed by chair)**

30

Summary

RZG is running in production AFS/OSD still mostly in the 1.4 version. The development of AFS/OSD, however, is following OpenAFS 1.6. Only the HPSS (high-end HSM system) support for AFS/OSD is in production with the 1.6 version at RZG. Tests at Paul-Scherrer-Institute in Switzerland have shown that it also works fine with SAMFS as HSM system.

The code for AFS/OSD which will go into the git-master will be compatible to the 1.6 version, but not to the 1.4 version any more.
