### Summary

A short overview will be given what tools are available to work with AFS using perl. Simple scripts using the perl-AFS module will be presented to demonstrate its interface. Other options like calling command line tools from within perl and parsing the output or exploring binary AFS structures will be mentioned as well.

**Primary author:** FRIEBEL, Wolfgang (DESY)

**Presenter:** FRIEBEL, Wolfgang (DESY)

**Session Classification:** Programming around AFS and Kerberos
