Week	Process	Duration (Weeks)
1 - 3	Raw Materials	3
4 - 5	Compactation	2
6 - 7	Sintering	2
8 - 9	Rolling	2
10 - 11	Machining	2
12	Inspection	0.5
12	Quality Assurance Certificate	0.3
12	Packaging and Shipment	0.2

Also, I asked about the payment conditions.... I'm still waiting for a reply

1. Where should the acquired tungsten plates be delivered?

...to Warsaw University for preliminary tests

...to Kraków AGH for TB assembly preparation?

2. Storage Consideration:

Can we leave these W plates in the same place with the other calorimeter components (e.g., mechanical frame, sensors, electronics, etc.)?
