

# Meeting Notes

## 21st of January 2025

- Governance
  - Max was not able to create the repo and load the first draft
  - He is planning to do it before the next meeting
- Website
  - Despina showcased the restyling
  - A generic github token is needed to allow access to some properties of the project.
  - We need to figure out which information can be pulled with and without token
  - We need to create an info mailing list which will distribute the email to selected members of the collaboration. Max and Laura volunteered.
  - Despina will finish the first draft and then will meet with Max to discuss last details and deployment.
- PSI dataset ingestor and additional features
  - Spencer presented the PSI dataset ingestor and openEM data sharing to the community.
  - Summary can be found on this FE issue:  
<https://github.com/SciCatProject/frontend/issues/1714>
  - Slides can be found at this link: <https://zenodo.org/records/14718375>
  - The main questions from PSI are:
    - can these features be integrated in the main FE or should be left as third party separate applications?
    - If the community see the benefits to integrate them, how should we proceed?
  - Please review the information on the github issues and provide feedback
- Dylan reminded the community that they would like to proceed with the feature of “datasets configurable links”
  - The links should be integrated in the FE
  - The links should be applicable to datasets with a rule based system configurable by the site admin
- OpenApi plugin for Swagger
  - Emil presented his proposal to use the openApi plugin to simplify the swagger api definition.
  - His work can be reviewed in this merged PR:  
<https://github.com/SciCatProject/scicat-backend-next/pull/1629>

- The community adopted the proposed solution which will be implemented incrementally on all the sub-systems
- Custom Dataset Details
  - Max showed the work done by Jay in the FE for a new configurable custom Dataset Details.
  - This feature can be enabled in configuration.
  - When enabled, it substitutes the standard dataset details page.
  - The work done can be found in the following PR:
    - <https://github.com/SciCatProject/frontend/pull/1704>

# Proposed Agenda

## 4th of February 2025

- ESS ingestor  
Max will introduce the new ESS ingestor  
(<https://github.com/SciCatProject/scicat-filewriter-ingest/tree/main>)
- Release review
- Issues and PR
- Other topics

## SciCat Collaborators Zoom meeting details

Topic: SciCat Collaborators Meeting

Time: Jan 7, 2025 04:00 PM Copenhagen

Every 2 weeks on Tue, until Dec 23, 2025, 26 occurrence(s)

Please download and import the following iCalendar (.ics) files to your calendar system.

Weekly:
