## At the interface between science and politics

*Thursday 19 March 2026 12:45 (5 minutes)*

Why is it important to fund facilities for research with synchrotron radiation, neutrons, ions and accelerators? How can we get their users, facilities and politicians to pull together to advance science? I will give examples of how the German user committees KFS, KFN, KFSI and KfB coordinate personal dialogue, cooperation, public relations and networking for this purpose.
