### Invited panel: "Research Infrastructures and Quality in Science Communication"

*Thursday 19 March 2026 09:30 (1h 15m)*

The conference panel will explore science communication from three complementary angles: its practitioners, the role of writing, and the evolving relationship with public research institutions. Through presentations and a moderated discussion, panelists will reflect on what defines "quality" in today's communication landscape, before opening the conversation to the audience. Be ready to be challenged, inspired, and engaged in rethinking how science is communicated today.

**Presenters:** FISCHER, Lilian (Wissenschaft im Dialog); HAGARDT, Maria (Swedish Research Council); CATANZARO, Michele (Autonomous University of Barcelona)

**Session Classification:** Plenary session
