PUNCH 2.0 - Workflows

H. Enke / G.Maier

Workflows.

- What is in this box?
    - Standardized workflows, implementation (e.g., REANA), documentation, training, FAIR workflow integration
    - Workflows along the selected Use Cases
- What are the 3 main deliverables / milestones?
    - 1. Stable standardized workflow environments (e.g. container stack per PUNCH domain) with DRP integration
    - 2. On-site targeted training (FAIR workflow development, CWL, etc)
    - 3. PUNCH workflow platform based on REANA
- Approx. resource requirements?
    - Personnel: NN FTEs
    - Infrastructure: C4P/S4P/git/container & workflow registry/AAI
- Involved / interested / necessary institutions?
    - AIP, DESY, …
- Community coverage – i.e. who is potentially left behind?
    - …
- Gap analysis – are these the right boxes?
    - How do we implement workflows also including NHR resources
    - How can we get also on a working level with HPC?
    - Build more trust with resource providers
