First Electron Beams from the High-Average-Power Laser-Plasma Accelerator KALDERA

Monday 3 November 2025 19:55 (3 minutes)

Laser-plasma acceleration (LPA) is a promising technology for future compact accelerators. However, the low repetition rate (typically few Hz) of today's high-power laser systems prevents reaching the average power required by applications and hinders the implementation of fast feedback systems to mitigate beam instabilities. To this end, DESY has established a dedicated research program on high-average-power LPA. Our flagship project KALDERA pursues the development of a new laser tailored to plasma acceleration. Based on Ti:Sa technology, the system will deliver pulses at 100 TW peak power at up to 1 kHz repetition rate and by that enable the application of active stabilisation techniques to enhance LPA performance. Here, we report on the development and commissioning of MAGMA, the first LPA powered by KALDERA. We present first results on electron injection and acceleration to around 100 MeV at a repetition rate of 100 Hz, reaching into previously uncharted LPA territory.

Speed talk:

I am unwilling/unable to present a speed talk

Author: NIGGEMEIER, Luisa (MPL (Plasmabeschleuniger und Laser))

Co-authors: JALAS, Soeren (MLS (Laser fuer Plasmabeschleunigung)); MESSNER, Philipp (MLS (Laser fuer Plasmabeschleunigung)); NECHAEVA, Tatiana (MLS (Laser fuer Plasmabeschleunigung)); HÜBNER, Lars (University of Hamburg); WINKLER, Paul Viktor (MPL (Plasmabeschleuniger und Laser)); BRAUN, Cora (MLS (Laser fuer Plasmabeschleunigung)); WERLE, Christian (MPL (Plasmabeschleuniger und Laser)); Dr GONZALEZ, Juan (MPL (Plasmabeschleuniger und Laser)); EICHNER, Timo (MLS (Laser fuer Plasmabeschleunigung)); Mr SCHNEPP, Matthias (UNI/EXP (Uni Hamburg, Institut für Experimentalphysik)); HÜLSENBUSCH, Thomas (CFEL / Hamburg University); VIDOLI, Caterina (MLS (Laser fuer Plasmabeschleunigung)); YOUSEFI, Abdullah (MLS (Laser fuer Plasmabeschleunigung)); SCHUBERT, Kaja (MPL (Plasmabeschleuniger und Laser)); WALKER, Paul Andreas (MLS (Laser fuer Plasmabeschleunigung)); Dr WINKELMANN, Lutz (MLS (Lasers and Secondary Sources)); PALMER, Guido (MPL (Plasmabeschleuniger und Laser)); LEEMANS, Wim (M (Beschleuniger)); KIRCHEN, Manuel (MLS (Laser fuer Plasmabeschleunigung)); MAIER, Andreas (MPL (Plasmabeschleuniger und Laser))

Presenter: NIGGEMEIER, Luisa (MPL (Plasmabeschleuniger und Laser))
