Experience science through film!

A film that portrays the remarkable life of a renowned physicist, focusing on his groundbreaking work in theoretical physics and his battle with a debilitating illness. Set against the backdrop of his early career, it highlights his relationship with his first wife, who supports him through his struggles as his condition worsens. Despite his physical limitations, he continues to push scientific boundaries, making profound contributions to our understanding of the universe. The story captures his perseverance, intellect, and emotional challenges.
