Experience science through film!

He's a businessman, inventor, scientist, Nobel Prize laureate, gourmet, two-time Olympic champion, and a genius... oh, and did we mention he's a dog? He invents an extremely ingenious time machine. Using this, he and his adopted human son travel back in time to witness pivotal moments in world history first-hand and meet some of the most famous people ever to have lived. But when his son breaks the rules of time travel, our two heroes find themselves in a turbulent race to repair the past - and save the future.
