## *Experience science through film!*

A film following a young girl with extraordinary mathematical abilities being raised by her uncle in a small town. While her intellect sets her apart, her uncle is determined to give her a normal childhood. Tensions arise when her grandmother, who has different plans for the girl's future, enters the picture, leading to a custody battle. The story explores themes of family, sacrifice, and the challenges of nurturing both a child's talents and emotional well-being, as the characters navigate difficult decisions about what's truly best for the gifted young girl.
