

Plans for gen exercise

Dominic Stafford, Mikel Mendizabal Morentin

14.07.2024

DESY DAS planning meeting

Exercise plans

- Plan to offer modified version of 2023 PODAS exercise
- Focus on ttbar production
- Standalone Madgraph + CMSSW pythia
- CMS madgraph gridpack generation
- Rivet for validation and short intro to coding analyses

Logistics

- Currently 2 facilitators, third might be helpful
- I currently have shifts booked directly before due to a confusion with dates, but plan to offer some and travel back earlier
- Exercise can run completely on NAF
- Students will likely need a CERN account to clone `genproductions_scripts`, but could offer an alternative
