Meeting Notes

27th of May 2025

- Regina
  - restored database dump from other instance
  - no proposal visible in FE for admin user
  - BE swagger interface return 403
  - unclear what is the issue
- API versions
  - should we transfer v3 endpoints with no v4 version to v4 as they are?
  - Collaborators are leaning towards this solution.
  - OrigDatablocks are needed in API V4
  - Some contributors where inquiring about the datasets endpoint that were have not been ported to V4
  - Max sustains that you can retrieve the same information with the current V4 endpoints and changing the query
    (hopefully he is correct)
  - Dataset v4 has been tested (Thanks Emil) but still needs extensive testing
- PySciCat
  - Currently is based on BE API v3
  - Dylan asked if it should also support v4 (although is not complete yet) or support a mixed mode
  - If we adopt the solution to complete v4 by elevating v3 endpoints missing in v4 to API v4 as they are, we should try to refactor pyscicat to just use v4
- UI/UX restyle
  - Max presented first draft of FE restyle
  - Draft PR open: https://github.com/SciCatProject/frontend/pull/1860
- Dataset Life Cycle
  - Started discussion on permissions
  - Who can update what?
  - Some information in the dataset life cycle influences external workflow and should be updated only by such workflows.
  - Can we have single solution that works for all facilities
  - Currently dataset Life cycle is used only by PSI.
  - More brainstorming is needed.

Proposed Agenda
10th of June 2025

- SciCatCon 2025 program
- Dataset Life Cycle
- Published Data Workflow in FE
- PRs and issues Prioritization
