Constellation v0.6.1 Release

Triangulum Australe

- Fixes Constellation's Python version on Windows
- Early builds for Constellation's C++ version for Windows
- Fixes that last data records of a run might not be sent

Check out the [release notes](#) for more details!

Constellation v0.7 Progress

Reticulum

- Fix for Constellation breaking during daylight saving time (DST) change ([Issue#291](#))
 - Discovered by MADMAX running Constellation in production
- Support for YAML configuration files ([MR!906](#))
- Progress on the configuration dictionary support in C++ ([MR!951](#))
 - Almost complete, tests and file parsing still missing
 - Side note: trivial in Python to implement since recursive structure are easy there

New Meeting Time for the EDDA Meeting

- Current meeting time overlaps with department meeting @ Uni Lund
- Thus we are looking for a new time slot which fits most people
- Poll for new meeting times: <https://timeful.app/e/2FbaB>
- Some notes:
 - Meeting will take place monthly either in the first week (first Nov 24-28) or the last week (first Dec 1-5) of a month
 - Please indicate general availability, not just for the next meeting
 - Please fill out the poll until November 16
