

# MC4BSM - Monte Carlo for Physics beyond the Standard Model

## Saturday 20 April 2013

### Searches, Analyses, Model testing I - Main auditorium (09:00 - 10:30)

| time  | [id] title                                                                                  | presenter             |
|-------|---------------------------------------------------------------------------------------------|-----------------------|
| 09:00 | [32] TemplateTagger 1.0 - a C++ code for jet substructure using the Template Overlay Method | BACKOVIC, Mihailo     |
| 09:20 | [33] Deriving Approximate Likelihood maps for direct SUSY searches from the LHC             | SESSOLO, Enrico-Maria |
| 09:40 | [34] Automated mass spectrum generation for New Physics                                     | DE CAUSMAECKER, Karen |
| 10:00 | [35] KaBoom: A New Dark Matter Tool for the LHC                                             | MCCASKEY, Mat         |
| 10:20 | [36] Discussion                                                                             |                       |
