

# HAP Dark Matter 2013

## Monday 18 February 2013

### Astronomical Observations II - Hörsaal S1 (16:00 - 18:30)

-Conveners: Marek Kowalski

| time  | [id] title                                                            | presenter            |
|-------|-----------------------------------------------------------------------|----------------------|
| 16:00 | [1] FERMI DM results                                                  | COHEN-TANUGI, Johann |
| 16:45 | [30] Dark Matter constraints from FERMI-LAT inner galaxy measurements | MUNOZ, Carlos        |
| 17:20 | [22] Density profile of central region of DM halos                    | BAUSHEV, Anton       |
| 17:55 | [23] What if DM gamma ray lines come with gluon lines?                | CHU, Xiaoyong        |
