

NAF Status Report

Andreas Haupt, [Yves Kemp](#)
NUC, 8.5.2013

Problem reports last month

- > Queue setup NAF 1.0
 - User reporting jobs will not start – transient problem reported by user
- > /tmp problem of one user
 - This time other users reported to misbehaving user directly who killed jobs
- > NAF 2.0 testing
 - Missing RPM
 - Question on Sonas space
- > Slow Sonas reading
 - Not reproducible, no indication in log files
- > (Mis)use of WGS by one user
 - Too many processes, affecting other users
- > Sonas monitoring for Belle @ NAF2.0
 - ... will come

Lustre in Hamburg

- > Announcement to users
- > “1.8.2013 - at which time we will mount the Lustre systems read-only.”
- > “We will switch off Lustre on 1.10.2013, and start decommissioning of the Lustre server and storage nodes.”

Action items

- > 1210-2 NAF 2.0 offer better monitoring for queue usage (per user, waiting time, run time, etc)
 - Working in general on monitoring for SGE batch system
 - Nothing ready to show now – but what you have now will be there in future (as a minimum) 1210-3 NAF 2.0 & experiments reconsider queue setup, scheduling, dynamic or configurable queue limits
- > 1302-1 NAF admins prepare documentation for NAF 2.0 accounts and migration
 - ... still on the ToDo list ...
- > 1302-2 NAF admins clearly document what scratch space means and policy for Lustre and SONAS
 - ... still on the ToDo list ...

Information on ini / SL5

- > All modules available on NAF 1.0 will be made available on NAF 2.0
 - Still this week

- > (Historical) problem with ini in non-login shells (e.g. batch jobs)
 - Alias ini not available
 - Should be solved now – if not: Please report

Information on module for SL6: An example

```
nafhh-sl6tst::~~>root
-bash: root: command not found
nafhh-sl6tst::~~>module avail
```

```
----- /usr/share/Modules/modulefiles -----
dot          module-cvs  module-info modules      null          use.own
```

```
----- /etc/modulefiles -----
idl/8.0       maple/14      mathematica/8.0 pgi/2011
idl/8.1       maple/15      mathematica/9.0 pgi/2012
idl/8.2       maple/16      matlab/R2010b   pgi/2013
intel/2011    maple/17      matlab/R2011a   root/5.32.00
intel/2013    mathematica/5.2 matlab/R2011b   root/5.34.00
intel.2011    mathematica/6.0 matlab/R2012a   texlive/2008
intel.2013    mathematica/7.0 matlab/R2012b   texlive/2011
```

```
nafhh-sl6tst::~~>module load root
nafhh-sl6tst::~~>root
```

```
...
*   Version    5.34/04    10 January 2013    *
...
root [0]
```

AFS and NAF 2.0

> Administration tools for NAF 2.0

- Currently, AFS cell DESY.DE being modernized
- New server version, new hardware, ...
- New platform adapter (the glue between the DESY Registry and AFS)
- In this context administrative tools will come

> “Scratch-like” volumes

- We have the space for O(10GB/user) volumes
- We have in place the possibility to create XXL volumes
- Investigating automatism for automatic creation of volumes

```
nafhh-s16tst::xxl>fs lq
```

Volume Name	Quota	Used	%Used	Partition
xxl.kemp	8000000	5488115	69%	78%

```
nafhh-s16tst::xxl>pwd
```

```
/afs/desy.de/user/k/kemp/xxl
```
