

Status of the Helmholtz Validation Fund Project "MTCA.4 for Industry"

The Helmholtz Validation Fund project "MTCA.4 for Industry" has successfully passed the mid-term evaluation and it was extended by half year till end of 2014. The industrial consortium has grown from initially 7 to meanwhile 12 partners. More than 27 hardware developments have been defined with many close to completion. In this presentation a summary of the achievements, overview on the current sub-projects and future plans will be given.
