

MMC V1.0 - DESY Starter Kit for MTCA.4 Module Management

Thursday 12 December 2013 14:45 (13 minutes)

The talk will present the MMC V1.0 software framework for management of MTCA.4 cards. This framework is a “drop-in” module that can be used to implement management of MTCA.4 cards in a very short time. To allow fast development, DESY also created a hardware reference Platform “MMC V1.0 Starter Kit” that will be presented in the talk. The kit contains an example design for an AMC and a RTM board and can be used without modifications in custom hardware due to availability of source code and schematics.

Primary authors: Dr MAKOWSKI, Dariusz (DMCS); Mr FENNER, Michael (DESY); Mr JAROSLAW, Szewinski (DESY)

Presenter: Mr FENNER, Michael (DESY)

Session Classification: Interoperability - further developments
