

Mini Workshop on "Characterization of High Brightness Beams"

Contribution ID: 51

Type: **not specified**

further contributions and general discussion

Thursday 29 May 2008 17:05 (55 minutes)

- reliability of slice emittance measurements
- usability of slice emittance measurements for beam optimization (correspondence of measurement and simulations)
- correspondence of machine parameters for optimum slice emittance and optimum projected emittance

Session Classification: Afternoon session II
