

# Combined measurements of the properties of the Higgs boson using the ATLAS detector

*Monday 25 August 2014 16:50 (20 minutes)*

A review of the combination of the coupling and spin CP properties measurements of the recently discovered Higgs boson using the ATLAS detector and up to 25 fb<sup>-1</sup> of 7 TeV and 8 TeV pp collision data collected in 2011 and 2012 will be presented.
