

Measurement of the Higgs boson mass with the ATLAS detector

Monday, 25 August 2014 15:00 (20 minutes)

The latest results on the measurement of the Higgs boson mass in the diphoton and ZZ decay channels with the ATLAS detector is presented, using approximately 25 fb⁻¹ of pp collision data collected at 7 TeV and 8 TeV in 2011 and 2012.

Primary author: Mr KORTNER, Oliver (Munich MPI)

Presenter: Mr KORTNER, Oliver (Munich MPI)

Session Classification: Standard model physics at the TeV scale

Track Classification: 6) Standard model physics at the TeV scale
