

## **Search for the Higgs boson in fermionic channels using the ATLAS detector**

*Monday, 25 August 2014 16:30 (20 minutes)*

Since the discovery of the Higgs boson by the ATLAS and CMS experiments at the LHC, the emphasis has shifted towards measurements of its properties. Of particular importance is the direct observation of the coupling of the Higgs boson to fermions. In this presentation a comprehensive review of ATLAS results in the search for the Higgs boson in tau, muon, and b-quark pairs will be given.
