

Recent flavor physics results at CMS

Thursday, 28 August 2014 14:50 (25 minutes)

Thanks to the excellent tracking and muon identification performance, combined with a flexible trigger system, the CMS experiment at the Large Hadron Collider is conducting a rich and competitive program of measurements in the field of heavy flavor physics. In this talk we review our most recent results on heavy flavour physics, based on a data sample collected by the CMS detector.
