HLT b-tagging: validation and DQM offline

author: "I. Marfin <igor.marfin@desy.de>"

HLT Btagging

- HLT b-tagging Validation software

    - needs to integrate to CMSSW release

- HLT b-tagging in `DQM Offline` and `DQM Online`

    - needs to adopt for the format of the DQM modules

    - more details (thanks to Darren)

CMSSW release

```
cmsrel CMSSW_7_0_X
cmsenv
git cms-merge-topic DQM/ThePackageIWantToWorkOn
#add your changes, make sure you do all the proper testing that
#I mentioned previously (e.g. whiterabbit tests), when you are ready:
git add filesIHaveModified
git commit -m"comment"
git push my-cmssw HEAD:NameOfTheBranch
```

```
At this point, the branch is ready for integration.
You can go to the website from your GIT account, and submit
it as a pull request for integration in 70X.
More and the same information can be found here:
```

```
http://cms-sw.github.io/cmssw/index.html
```
