

- Web-based service
- no specific S/W installation on user side
- accessible from
 - P5, CERN
 - Remote
- access to histograms
 - Online (live)
 - Online (file-archive)
 - Offline Tier-0 (file-archive)
 - Offline CAF, Tier-X, ...

Simple and fast access to all DQM data – Same tool for online and offline DQM

DQM group provides infrastructure, coordinates intergretion, organizes operation

DQM project page at https://twiki.cern.ch/twiki/bin/view/CMS/DQMInfrastructure

DQM system baseline deployed during GREN

3

Online DQM

Real-Time Detector and Operation Efficiency

Code Developments

- Based on experience in 2007 major modifications of the code infrastructure have been implemented
- Upgrade of histogramming framework
 - Cleanup and code simplification
 - New histogram transport layer
 - New data structure
- New features for Web-GUI
 - Improved Navigation
 - GUI access to archived histogram files

1 DESY Fellow joined the effort in Dec 07

Integration / Operation

- Support for real-time monitoring during commissioning for all detector components
- First version of detector status summary views deployed

	Error		Lumi				Processed	Event	Monitor
Subsystem	summary	Run	section	Event	Last update	Last event	events	rate	elements
CSC	-1	30129	4	918	30 secs in future	30 secs in future	1286225	2.45	16
EcalBarrel	-1	30129	4	921	30 secs in future	30 secs in future	1046380	1.77	853
Hcal	0.696	30129	4	977	30 secs in future	30 secs in future	1286650	2.48	189
L1T	-1	30129	4	921	30 secs in future	30 secs in future	1284325	2.42	189
RPC	-1	30129	4	942	30 secs in future	30 secs in future	1125321	2.35	145
SiStrip	1	30129	4	936	30 secs in future	30 secs in future	511625	2.45	216

- Online DQM in RunControl
 - Online DQM Applications
 - StorageManager Proxy Server

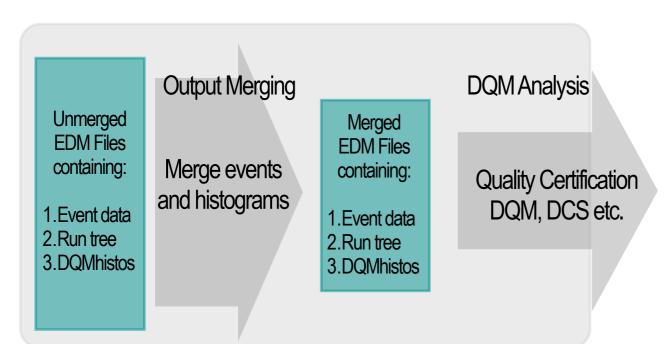

Offline DQM

Data Quality Certification / Validation

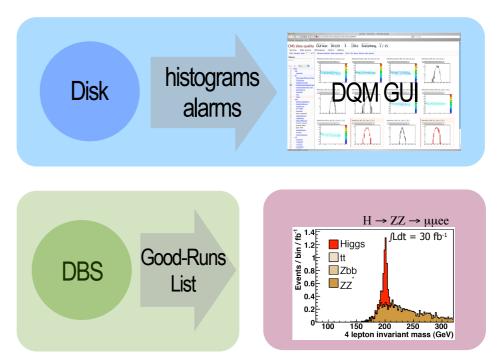

- Requirement:
 - Code portability between online and offline
- Status:
 - Workflow defined, core software components implemented
 - Online software reused for offline DQM, same web based GUI

Tier-0 Processing

Monitoring and Analysis

Offline DQM

Standardization:

- Integration campaign to establish conventions and coherence among the many DQM user groups (DPG, POG, PAG, AliCal)
- Next large scale meeting: Offline week beginning of April

Deployment:

- Functionality tests will be done using Relval processing
- Tracker is planning to use offline DQM for April 08 cosmics data taking
- DQM and Validation workflows of AliCal should be tested in context of iCSA08
- First working implementation of offline DQM workflows should be in place for CRAFT

Aiming for a homogeneous monitoring and data certification system across CMS

Summary

- DQM Software Development
 - Major code improvements, rewritten transport layer
 - DQM GUI access to file archive
- Online DQM
 - Operation in RunControl
 - First version of detector status & alarm summary views
 - Real-time data monitoring during Subdetector Commissioning
- Offline DQM
 - Scheme and core code devised
 - Functionality test underway / attempt production mode for CRAFT (May / June)
