Back-porting policy

- Bug-fixes are back-ported

- New features? NO

    ... except under extenuating circumstances

    - Code must already be released

    - Problem must affects many sites

    - Compelling reason why sites cannot upgrade

    - Must not break compatibility

    - Benefits outweigh the risks

- Remember: back-porting is DANGEROUS, back-porting new features is REALLY DANGEROUS.
