

# W gamma production at LHC with POWHEG + MiNLO

*Thursday 28 August 2014 11:35 (25 minutes)*

## Summary

We present the calculation of NLO QCD corrections matched to PS, within the PowHeg method combined with MiNLO, to W gamma production at LHC. We address both the direct as well as the photon fragmentation contribution. We discuss also a critical comparison of the new predictions with available NLO calculations and LHC data.

**Primary authors:** PICCININI, Fulvio (INFN Pavia); MONTAGNA, Guido (Pavia University and INFN); BARZE, Luca (CERN); CHIESA, Mauro (Pavia University and INFN); NICROSINI, Oreste (INFN Pavia); NASON, Paolo (INFN Milano Bicocca); PROSPERI, Valeria (Pavia University and INFN)

**Presenter:** CHIESA, Mauro (Pavia University and INFN)

**Session Classification:** Hard QCD/MC, heavy quarks and PDFs

**Track Classification:** HQCD
