

# MT POFIII Rehearsal

## Tuesday 25 February 2014

### ARD Parallel - Grosser Hoersaal (08:30 - 10:30)

| time [id]  | title   | presenter              |
|------------|---|------------------------|
| 08:30 [14] | CW SRF - enabling technology for next generation accelerators           | Prof. KNOBLOCH, Jens   |
| 08:45 [15] | Concepts and technologies for ultra short beams                         | MUELLER, Anke-Susanne  |
| 09:00 [18] | High brilliance electron beams from SRF guns                            | Dr ARNOLD, André       |
| 09:08 [20] | Heavy ion high intensity linac developments                             | BARTH, Winfried        |
| 09:16 [16] | Dedicated hadron accelerators   | Prof. LEHRACH, Andreas |
| 09:24 [17] | Perspectives of Plasma-Wakefield acceleration for compact light sources | Dr MAIER, Andreas R.   |
| 09:32 [19] | Laser-Plasma acceleration of ions                                       | ZEPF, Matt             |
| 09:40 [21] | Discussion  |                        |
