

Some Update on Trigger Studies

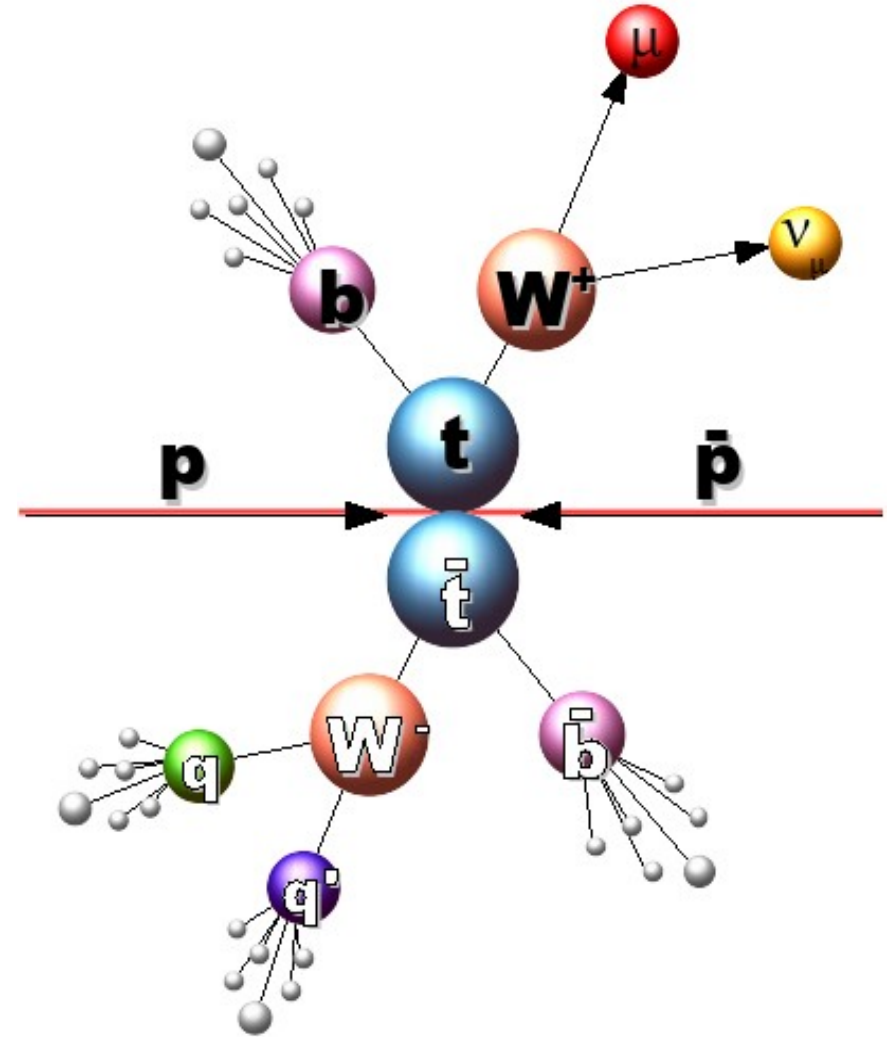

Sascha Mehlhase

Deutsches Elektronen-Synchrotron DESY
Zeuthen

DESY Zeuthen Meeting
May 6th 2008

Outline

- Eventtypes
- P_T and Eta distributions of Trigger Objects
- 'Simple' Monitoring
- Looking At Final States
- 'Detailed' Look At Some Triggers

Eventtypes

• ...

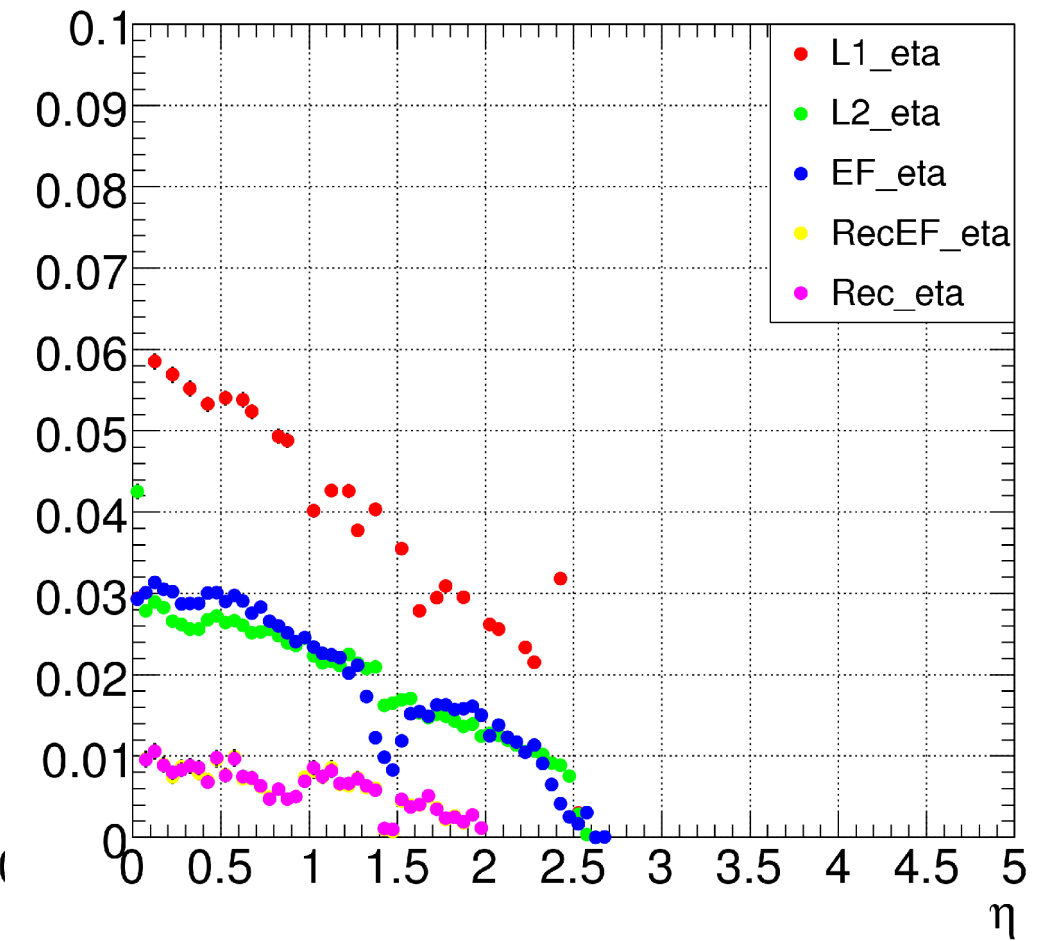

P_T and Eta distributions of Trigger Objects

- Electrons

Debug/Electron_p_T

Debug/Electron_eta

P_T and Eta distributions of Trigger Objects

- Muons

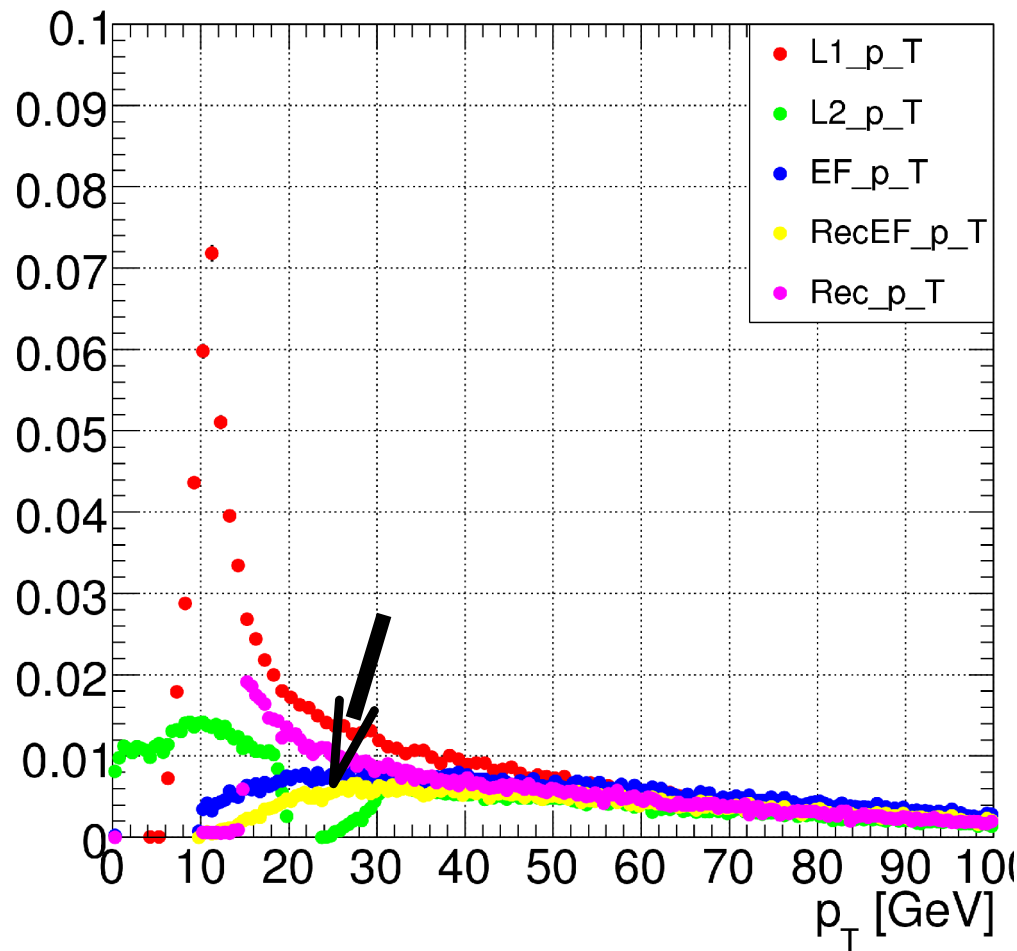

Debug/Muon_p_T

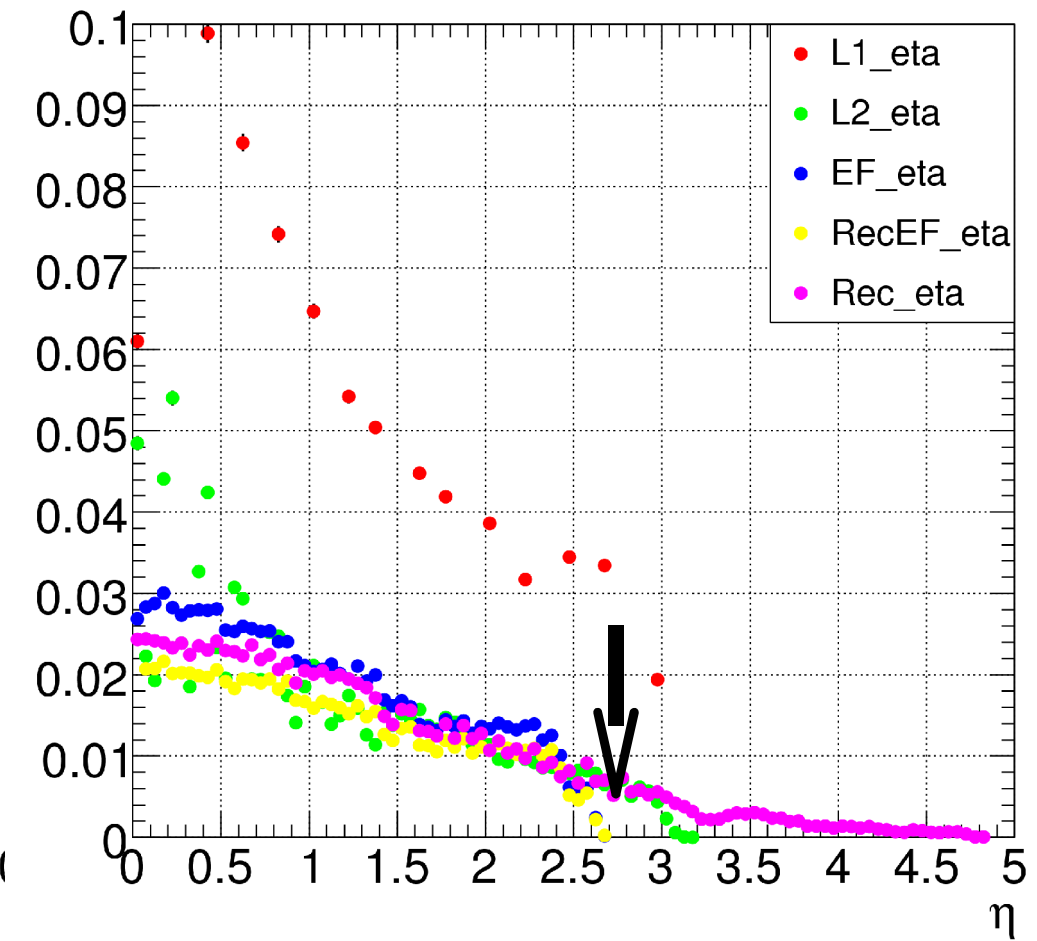

Debug/Muon_eta

P_T and Eta distributions of Trigger Objects

- Jets (some issues not understood yet, might be the sample, or not!?)

Debug/jet_ p_T

Debug/Jet_ η

'Simple' Monitoring

- For 1m4j Events at Level One (muon trigger against jet trigger and vice versa)

L1/1m4j/Jets

L1/1m4j/muon

'Simple' Monitoring

- For 1m4j Events at Level Two (muon trigger against jet trigger and vice versa)

L2/1m4j/Jets

L2/1m4j/muon

'Simple' Monitoring

- For 1m4j Events at EventFilter (muon trigger against jet trigger and vice versa)
(for comparison: all Events in the boxes)

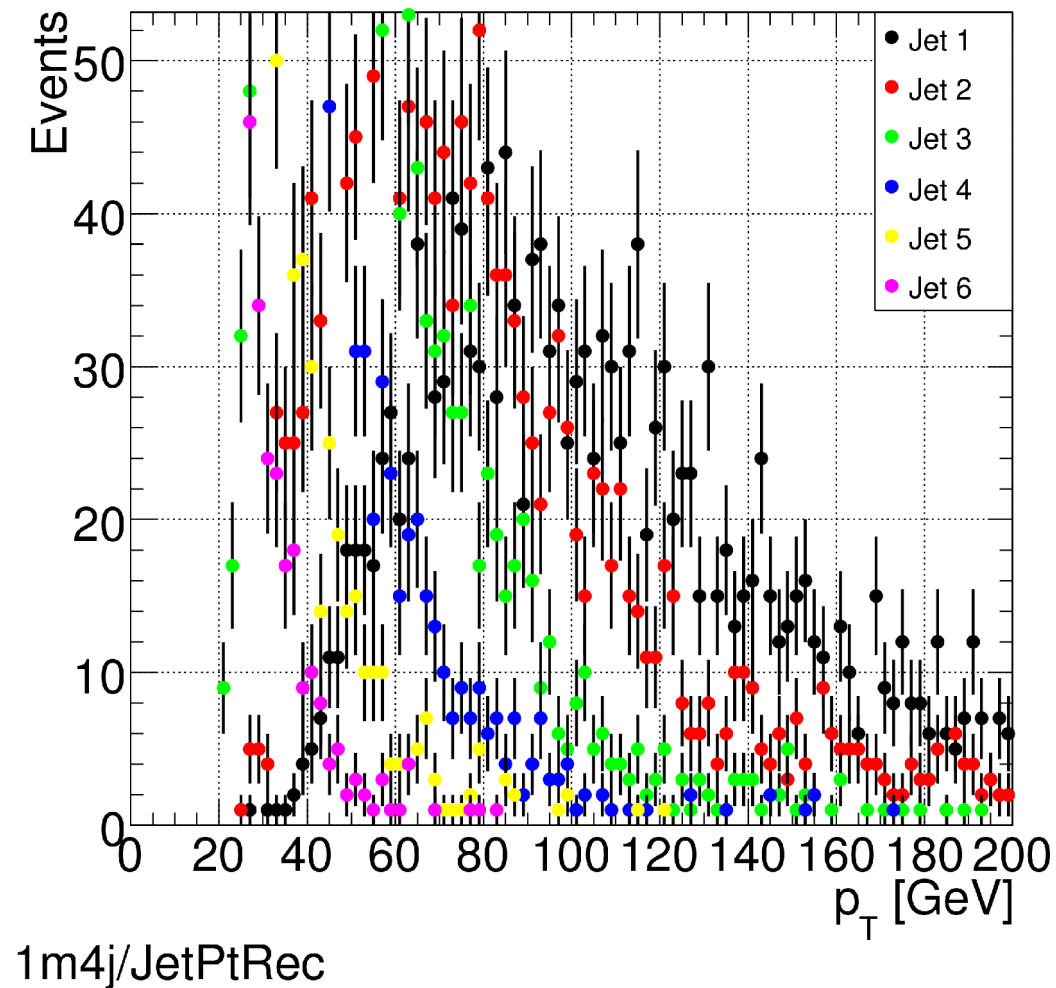

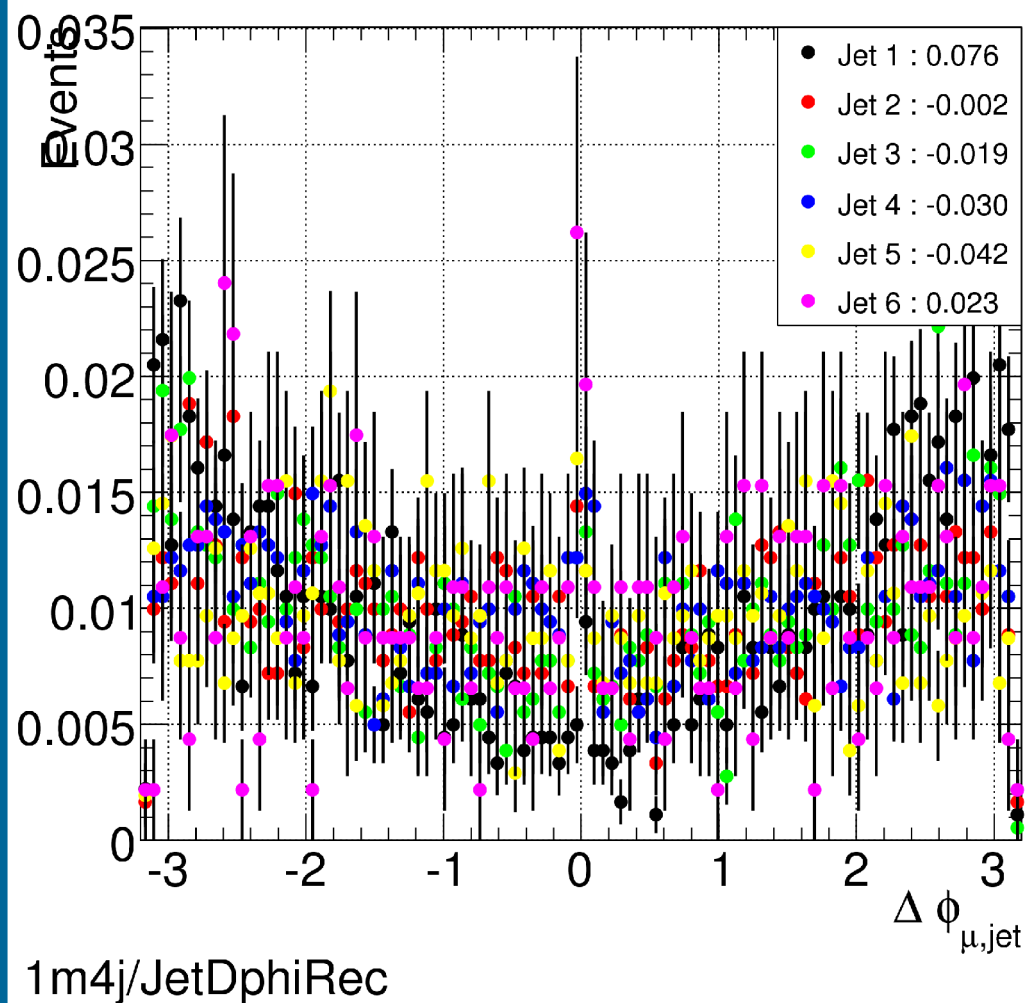

EF/1m4j/Jets

EF/1m4j/muon

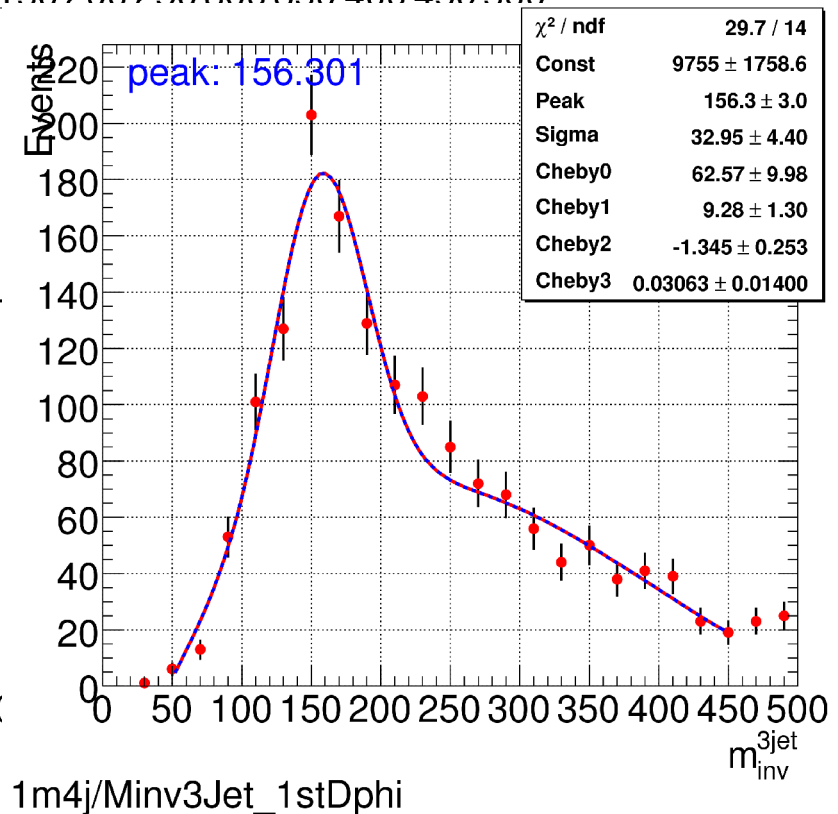

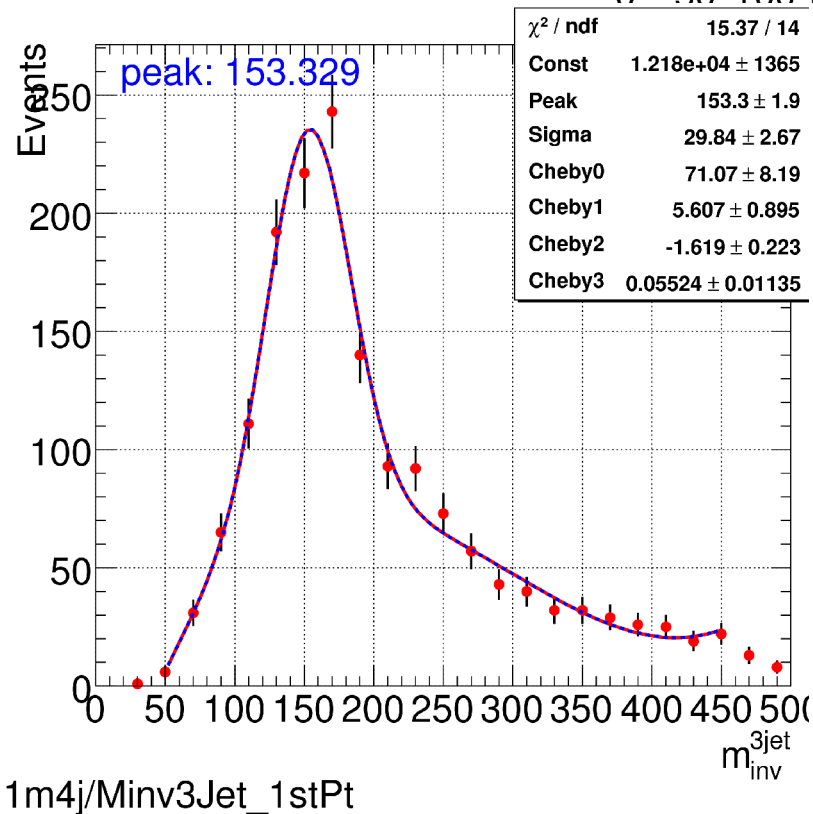

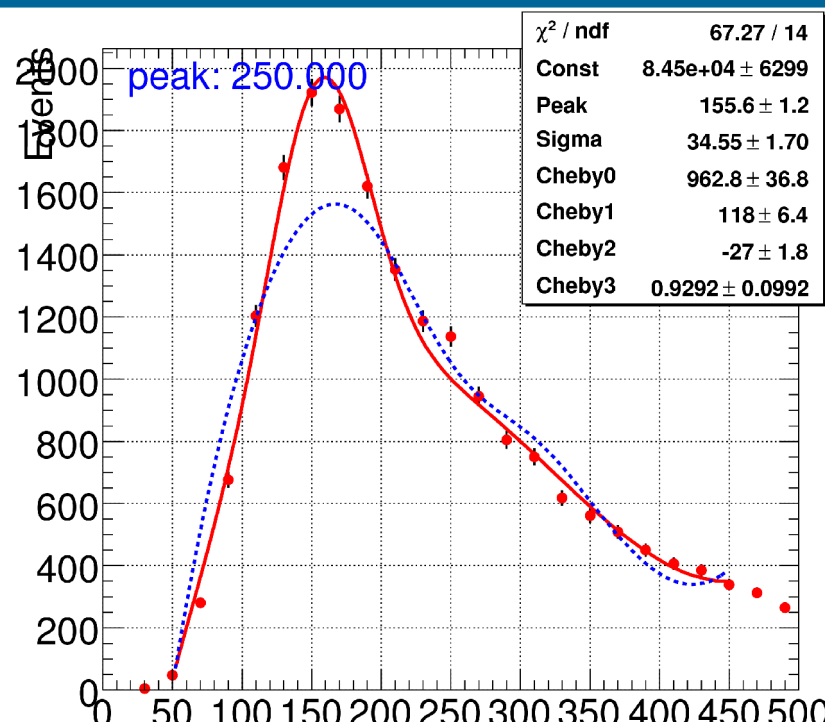

Looking At Final States

- 'Relation' between Lepton and Jets (ordered by p_T) for 1m4j Events

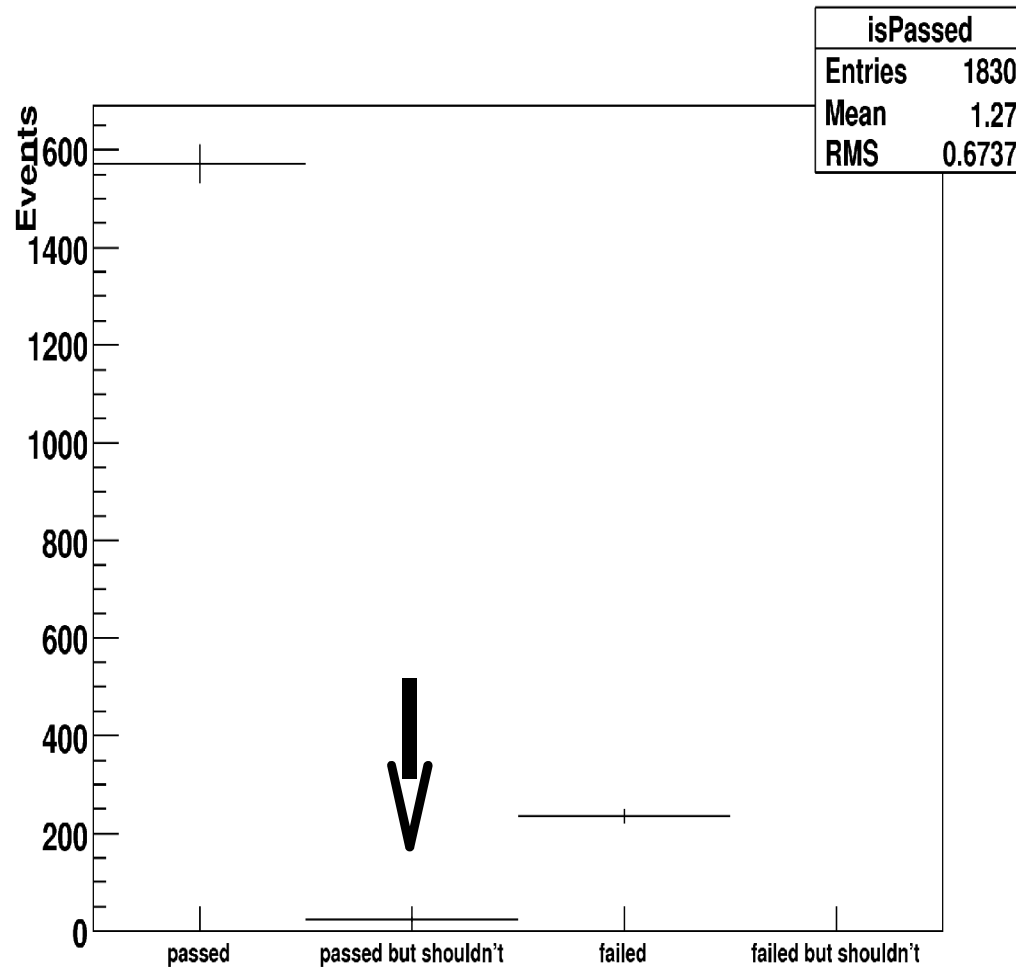

Looking At Final States

- $M_{\text{inv}}^{3\text{Jet}}$ for all, highest pT, and highest Dphi 3Jet-Combinations

'Detailed' Look At Some Triggers

- Level One Muon 20 GeV [L1_MU20] (comparing trigger objects with TrigDecision) and getting the number of possibilities that could have fired the trigger (zero excluded)

'Detailed' Look At Some Triggers

- Level Two 4 Jets 18 GeV [L2_4J18] (comparing trigger objects with TrigDecision) and getting the number of possibilities that could have fired the trigger (zero excluded)

'Detailed' Look At Some Triggers

- Eventfilter 3 Jets 18 GeV [EF_3J18] (comparing trigger objects with TrigDecision) and getting the number of possibilities that could have fired the trigger (zero excluded)

The End
