

# BMBF Verbundforschungstreffen für FLASH und PETRA III Projekte

## Thursday 10 July 2008

**Projects at PETRA III (cont.) - DESY Auditorium (Bldg. 5) (09:00 - 11:30)**

-Conveners: Jens Viefhaus

| time  | [id] title                                                                                                              | presenter                                |
|-------|-------------------------------------------------------------------------------------------------------------------------|------------------------------------------|
| 09:00 | [15] PIPE – a Photo Ion beam Facility at PETRA III                                                                      | Prof. MÜLLER, Alfred                     |
| 09:30 | [16] Soft X-ray photoelectron spectroscopy at PETRA III for in-situ real time studies                                   | Dr ROSSNAGEL, Kai                        |
| 10:00 | [17] Angle-resolved photoemission in the UV and X-ray regime: correlation, photon momentum effects and surface emission | Dr BRAUN, Jürgen                         |
| 10:30 | [18] X-Ray Absorption Spectroscopy with variable polarisation at 30 mK                                                  | Prof. WURTH, Wilfried                    |
| 11:00 | [19] UHV Diffractometer for resonant soft x-ray scattering at PETRA III                                                 | Dr<br>SCHÜSSLER-LANGEHEINE,<br>Christian |
