

EUCALL Workshop: User Access at Advanced Laser Light Sources

Access policies, CALIPSOplus and wayforlight

ELI-Beamlines, 21 – 22 September 2017

hZDR

**HELMHOLTZ
ZENTRUM DRESDEN
ROSSENDORF**

Outline

- CALIPSOplus in a nutshell
- History
- The wayforlight portal
- Single Entry Point
- Access policy in CALIPSOplus

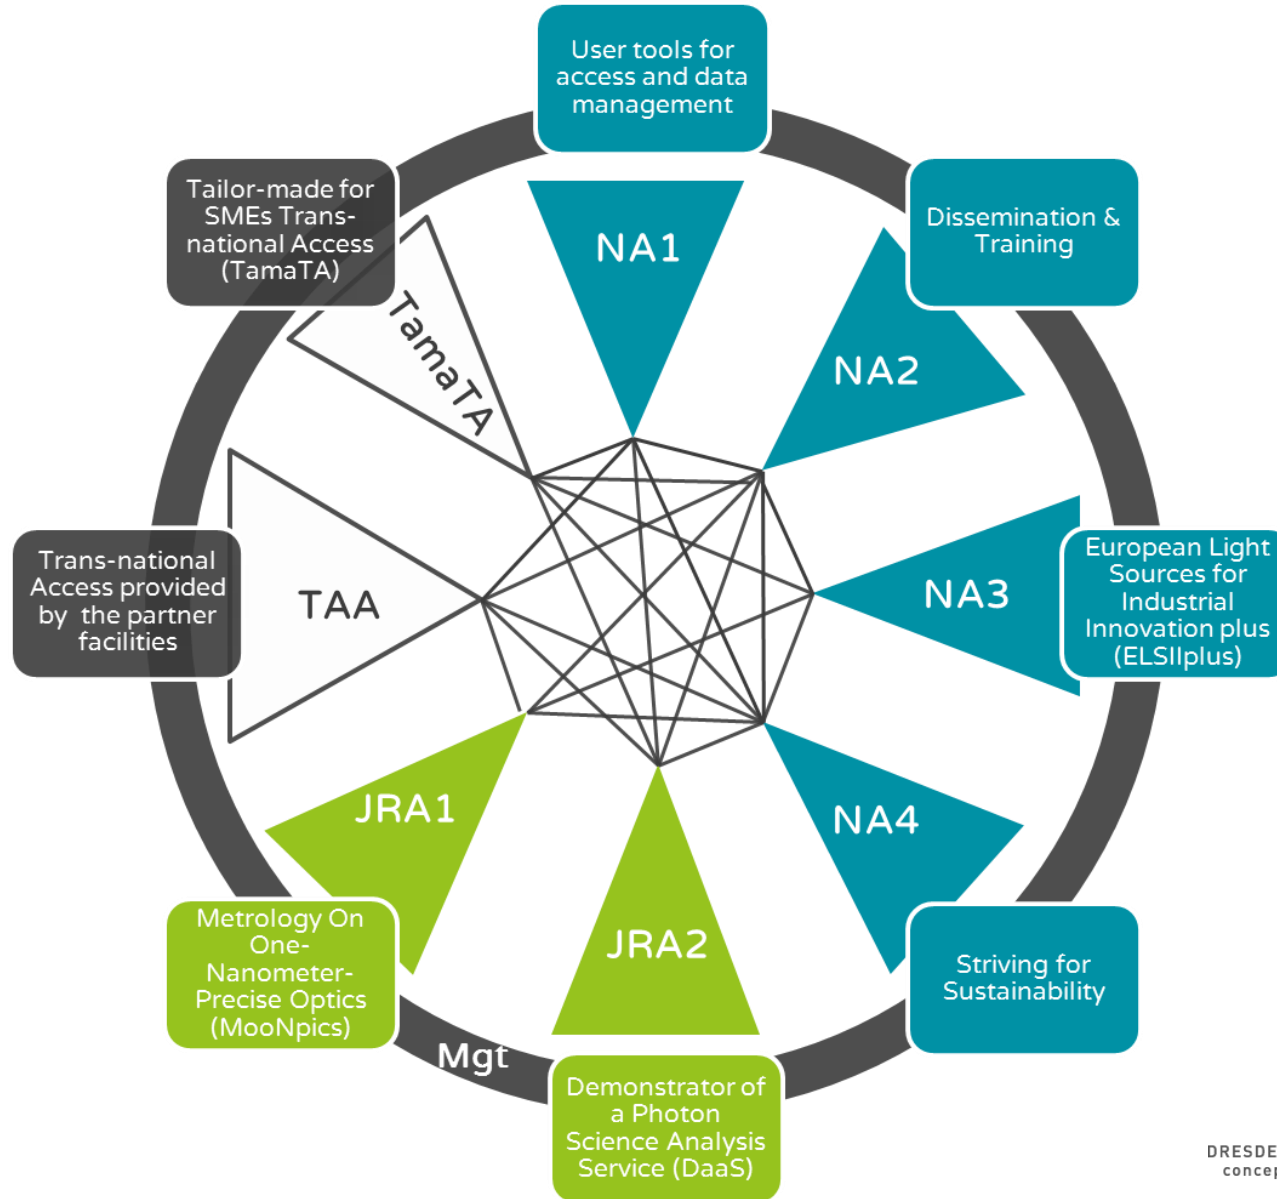

- Integrating Activity for *Advanced* Communities in reply to the call INFRAIA-01-2016 (Material Sciences and Analytical facilities/ Synchrotron radiation sources and Free Electron Lasers)
- Long-standing tradition of collaborations within the community: **IA-SFS** (FP6), **ELISA** (FP7), **CALIPSO** (FP7)
- Title: **Convenient Access to Lightsources OPen to Innovation, Science and to the WOrld**
- Coordinated by Helmholtz-Zentrum Dresden-Rossendorf e.V. (Manfred Helm)
- Budget: 10 MEUR
- 19 Partners, 3 associated partners, several observers
- 4 Networking Activities, 2 Joint Research Activities
- Provision of more than **82,500 hours of trans-national access** to **14 synchrotrons** and **8 free electron lasers**
- **Trans-national access tailor-made to SME** offered by 10 facilities
- Project running time: 1 May 2017 – 30 April 2021

Light sources collaborating in CALIPSOplus

Workpackage structures

Historically

Request by the EC for a central access management for all accelerator-based light sources

- >> 1000 users/ year/synchrotron
- large number of research fields

→ Request for several hundreds on reviewers

→ Consensus meetings twice/ year not manageable

→ „Compromise“ realised in CALIPSO:

- maintain decentralized access management
- realise wayforlight

The wayforlight portal (www.wayforlight.eu)

Pivotal platform for the user community of accelerator-based lightsources

- Beamline data sheets of all facilities
- Call deadlines
- Conferences, workshops and events
- ESUO section (European synchrotron & FEL user community)
- **Single entry point for proposal submission**

Proposal submission through Single entry point

- Common set of basic information requested by every facility = „Standardized proposal format“ to be completed on wayforlight
- Selection of the required facility
- Facility-specific application form to be completed in the electronic access management system of the selected infrastructure
- No data is stored on the wayforlight data base → proposal is only visible for the selected facility

Trans-national Access Management 1

Trans-national access is managed by the individual facilities according to their internal rules.

However, the facilities are committed to

- comply with the [Charter for Access to Research Infrastructures](#)
- to invest the best effort to [through the single entry point](#) on wayforlight
- to rank proposals based on [scientific excellence](#)
- as secondary criterion to give priority to proposals by
 - users without national light source
 - users from EU-13 countries
 - new users
 - user groups lead by women PIs
 - PhD students
- to collect [scientific reports](#) from the users within an appropriate timeframe following the experiment
- to collect [user feedback](#) on quality and convenience of the user access
- to strongly encourage publication of the results in OA journals → incentive!
- to request [acknowledgement](#) of EU funding

Trans-national Access Management 2

Tailor-made to industry

- Particular focus on SMEs (eligible for TAA, exempted from request for reporting and publishing)
- Access offered to a pool of infrastructures providing industry access
- Proposal submission through single entry point with a specific „industry-access-form“
- One single review panel
- Selection criteria are 1. scientific excellence 2. innovation potential and impact on the enterprise
- Proposal is assigned to the facility considered as being most suitable for the specific project

Thank you for your attention!
