

Posters

V. Alijani Zamani, S. Ouardi:

In-situ photoemission from room-temperature ionic liquids

A. Bartnik:

Fluorescent emission of solids illuminated with a laser-plasma EUV source

O. Bikondo, G. Carbone:

Coherent GISAXS from nanopatterned surfaces obtained by ion beam erosion: towards an XPCS study

A. Diaz:

Coherence characterization of a channel-cut monochromator using a double grating interferometer

M. Dierolf:

Ptychographic iterative diffraction microscopy with laser light

C. Günther, R. Könnicke:

Probing femtosecond dynamics with Fourier transform holography

J. Gulden:

Coherent x-ray diffraction measurements at the cSAXS beamline at SLS

U. Klemradt:

Fluctuations at the martensitic phase transformation of Au-Cd by XPCS

D. Ksenzov:

Reconstruction of energy distribution of FLASH pulses by periodical multilayers

A. Mancuso:

Coherent diffractive imaging measurements with higher harmonics at the PG2 beamline at FLASH

Posters

C. Mihoc:

Synthesis of Al-Cu-Fe/polymer composites

M. Nicoul:

Ultrafast x-ray diffraction experiments at SPPS

V. Richardson:

Photoelectron redistribution during ionisation in intense two colour fields

W. Roseker:

Development of a x-ray delay line for correlation spectroscopy and pump - probe experiments

A. Schropp:

Coherent diffractive imaging using hard x-rays

M. Sikorski:

Glass transition at a free surface of $C_{16}H_{22}O_4$

A. Singer:

Transverse coherence properties at FLASH

R. Thiele:

Plasmon dispersion relation in warm dense matter

F. Westermeier:

Hydrodynamics in colloidal suspensions: from highly charged to electrostatically screened particles

O. Yefanov:

Coherent GISAXS measurements of quantum-dot samples
