

Planned workshop publications

Double tracked approach:

1. very-short term:

- all submitted contributions will be registered as LC-notes
- collected and published in a dedicated DESY report within 'DESY-123' edition
- template already on the web
- no specific page limit
- **deadline: March 31st, 2012**

Please start a.s.a.p.

2. short term: EPJC Review Article

– should include

- key results of your new studies shown here
- status report of LC studies since TESLA TDR, NLC TDR, JLP TDR (physics parts)
- interpretation in view of current LHC results

– authors: you all + interested others !

– dedicated core team for writing required

– please feel welcome to join this team!

– completion planned for **early summer 2012!**

– More details: last session on Thursday

Please come. Your input is welcome and needed!
