

# Proposal to organize ISMD10 in Antwerp, Belgium

Note: 2010 is the year of retirement for Eddi De Wolf, although we all hope he will stick around for many more years as emeritus professor

## Antwerp HEP group

- 20+ members in total, most of us are working on the CMS experiment now
- 3 permanent full-time staff + 2 part-time professors
- Group leader: Eddi De Wolf

# Workshop on Low $x$ Physics

*Antwerpen (Belgium) 16-19 September 2002*

#### Topics include

- \* DIS at small  $x$  and structure functions of the proton, photon and pomeron
- \* diffractive events and the problem of the pomeron
- \* diffractive Higgs production at the Tevatron and LHC
- \* diffraction at HERA versus the Tevatron
- \* investigation of hadronic final states
- \* photoproduction and DIS at low  $Q^2$
- \* vector meson production
- \* prospects in hard photon-photon physics
